

Report Generation Tool ManagementPlus

Custom Reports, Security, Form Letters and Labels

Nearly any data entered into ManagementPlus can be easily retrieved, sorted, filtered and compared. This easy-to-use feature enables you to review at a glance any aspect of your practice. Report Generation Tool allows staff to run standard, real time data reports, or use the simple report building feature to create custom reports. Report on A/R days, charge and payment trending and cumulative collection percentage for growth and strategy development. Here is how it works for your practice:

- **Generate Reports From Virtually Any Field or Table.** ManagementPlus is a data-driven system and provides reporting from nearly any field or table. Whether custom fields or standard data tables, you can generate virtually an unlimited variety of reports.
- **Security Access Feature.** Limit those who view or alter reports. Easily customize access by individual staff person or security level. For instance, create reports to be viewed only by practice locations, physicians or administrators.
- **Reports can be generated from EHR.** When your practice implements Electronic Health Records all patient data will be stored electronically. ManagementPlus can generate custom reports directly from the patient record. You are able to design reports for myriad communication needs, such as the demographic breakdown of patients by physician or location.
- **Easily calculate numbers and figures.** No need to be an accountant, Report Tool easily does the calculations.
- **One-click, real-time data reports.** The system already contains a number of ready-to-use reports for many applications.

ManagementPlus Report Generation Tool Enables Your Practice to:

- ✓ **Report From EHR**
- ✓ **Reduce Errors**
- ✓ **Set Security Access**
- ✓ **Export Critical Data**
- ✓ **Maximize Revenue**

Report Generation Tool - ManagementPlus

Custom Reports, Security, Form Letters, and Labels

- **Create CSV files to use in other applications.** Export to Word, Excel or other database applications.
 - **Save and group common reports.** Organize common reports in the Favorites tab.
 - **Compare various practice assets.** Compare equipment usage, medicines, and marketing efforts, in order to focus on specific areas to maximize profits.
 - **Measure practice productivity.** Compare productivity by physician and/or location.
 - **Preview without printing.** Save time and paper by reviewing reports before printing or exporting.
 - **Filter, summarize and sort information.** Because it works like Excel, staff who use and understand Excel can easily use the Report Generation Tool to calculate numbers.
 - **Tailored to fit your needs.** The ManagementPlus system is flexible, easy to use and customizable. All the reporting features come standard with the system. As you add or create custom fields, Report Tool will report on the data from your custom fields.
- **Create a Comprehensive Business Plan.** Accountants greatly appreciate the data that Managementplus can generate. If your practice is seeking financing or planning to expand, a detailed and accurate business plan is an essential part of that effort. Report Generation Tool will provide the objective data you or your accountants will need to generate the documents necessary for an effective and comprehensive business plan.
- **Report from any custom field.** Your practice is singularly unique and so is ManagementPlus. The system allows you to create custom fields from which you can generate reports and compare data.
 - **Create mailing labels directly from the database.** Do a mail merge for postcards, billing and form letters. Target marketing efforts by zipcode, physician, diagnosis, or CPT code.
 - **Create custom form letters using Microsoft Word.** Import Word documents into ManagementPlus and save as custom form letters with mail merge capabilities.
