

Revenue Cycle Manager ManagementPlus

Billing, Electronic Claims, Collections and Eligibility

Accurate billing is crucial to the financial success of your ophthalmology practice, and the power to enable that success begins with Revenue Cycle Manager. It allows you to set up your billing process according to the way your practice functions because it was developed by healthcare professionals with accounting expertise. The ManagementPlus system has enabled users to reduce A/R to under 20 days with extremely accurate coding and reduced data entry errors. Here is how it works for you:

- **Billing Rules.** Your practice can maximize revenue by reducing data entry errors, reducing keystrokes, eliminating the need to memorize codes and numbers, thereby reducing claim denials.
- **Multiple or Solo Providers.** Instantly access records for any physician at any location; the system is especially suited to multi-location and multi-provider practices.
- **Three Levels of Claims Scrubbing.** Reduce claim denials and re-work by increasing first-time claim validation rates.
- **Easy-to-use.** Developed by healthcare professionals, ManagementPlus was designed to function like your practice by using familiar terminology and processes.
- **Capable of billing multiple entities.** Includes clinics, optical shops, and ambulatory surgery centers.
- **Print a daily report with one click.** List all billing activity for the day by transaction and physician.
- **Prints CMS 1500 and UB04 forms.**
- **Easily generate custom and stock reports.**
- **Unlimited rate schedules by insurance/payor.**
- **Charge capture at point of service with EHR.**
- **Export accounting data to QuickBooks & Excel.**

ManagementPlus Revenue Cycle Manager Enables Your Practice to:

- ✓ Integrate with EHR
- ✓ Reduce Errors
- ✓ Accurately Code
- ✓ Reduce Staff Time
- ✓ Maximize Revenue

Revenue Cycle Manager - ManagementPlus

Billing, Electronic Claims, Collections and Eligibility

Clearing House Services Through RelayHealth are Seamlessly Integrated.

Inefficiencies in communicating patient information can result in escalating costs, lost revenue and dissatisfaction among patients and healthcare providers. Promptly communicating the right information to patients is a crucial part of your business.

- **Electronic Claims Submission.** Through a single point of access, connects providers with HIPAA standard transactions, which reduces A/R days, increases operational efficiency, enhances profitability and lowers administrative costs.
- **Electronic Remittance Advice.** Captures remittance advice from payors and translates into a standard format for automatic payment posting, which eliminates errors, maintains accurate A/R days and lowers administrative costs.
- **Ambulatory Claims Management (Web-based Claims Editing).** Automates claim editing to identify errors before claim submission, which reduces rejections, improves workflow, decreases A/R days and improves cash flow.

Collections Tracks the Entire Revenue Cycle Process. Set up protocols with specific timelines to track each patient account electronically. After insurance companies pay for services, balances are transferred to patient accounts where each can be managed and monitored, saving your practice time and money on collection fees. ManagementPlus Collections is a simple and easy process handled directly from Revenue Cycle Manager.

Statements Processing.

ManagementPlus offers your practice nearly unlimited statement options such as:

- Ability to print statements by entity, including: ASC, clinics, and optical shops.
- Ability to print by location, alpha range, patient aging balance, payment due date.
- Ability to suppress statements by patient.
- Option to send e-statements: Electronic files are sent to RelayHealth for printing and mailing.

ALL THE TOOLS
