Developed by healthcare professionals using best-in-class technology ManagementPlus Ophthalmology Practice Management Software is the most user-friendly practice management solution available. The highly intuitive interface was designed by software engineers with ophthalmology and healthcare administrative experience. With a 97% live call ratio and a 98% claims acceptance rate, no other ophthalmic practice management solution can offer greater efficiency or better support.

CCHIT Certification® designates that ManagementPlus version 5.0 has been tested against the most comprehensive set of new and existing criteria related to items such as interoperability, functionality, privacy and security.
